

Hi-Cal Lime

"Plus" Soluble Humates
CaCO₃+
Standard & Micro Grade

Analysis:

Calcium Carbonate	92 %
Magnesium Carbonate	2.5%
Calcium Carbonate Equivalent.....	94.5 %
Soluble Humate.....	3%
Moisture - less than.....	1%

- Pelletized Natural Calcitic limestone with Soluble Humate. The easiest way to apply active humic acids to the soil.
- A valuable source of essential calcium in more plant available form than regular limestone.
- Contains natural trace elements and amino acids from soluble humate.
- Increases water holding capacity of soils
- Increases the cation exchange capacity of soils
- Unlocks insoluble nutrient bonds in the soil and increases their availability to plants.

Application Rates: *(Apply according to soil test)*

Normal Rate: 5lb per 1,000sf (50lb/10,000sf)

Corrective Rate: 10lb per 1,000sf (50lb/5,000sf)

Gypsum

"Plus" Soluble Humates
CaSO₄+
Standard & Micro Grade

Analysis:

Calcium Sulfate.....	83%
Elemental Calcium.....	24%
Elemental Sulfur	19%
Soluble Humate.....	3%
Moisture - less than.....	1%

- Pelletized Natural Calcium Sulfate with Soluble Humate.
- A source of essential calcium and sulfur.
- Provides a greater amount of calcium than other gypsum products.
- Stimulates the growth & proliferation of desirable soil micro-organisms.
- Unlocks insoluble nutrient bonds in the soil and increases their availability to plants.
- Helps break up compacted soil.

Application Rates: *(Apply according to soil test)*

Normal Rate: 5lb per 1,000sf (50lb/10,000sf)

Corrective Rate: 10lb per 1,000sf (50lb/5,000sf)
